

I am an XM subscriber and I am writing to ask you to reject the NAB's petition 04-160. I thoroughly enjoy all channels offered by XM radio and the weather and traffic channels are always available regardless of where I am traveling, which is not the case with regular radio stations. I am assured with XM radio that I will always be able to access these stations. Often while traveling the reception on regular radio stations for these channels is awful. Please allow XM radio to continue to grow and please reject the NAB's petition 04-160. Nancy Frazier
